

Aviagen Compartment Video

SUPPLEMENTARY
HANDOUT

What is **Compartmentalization**?

One or more establishments under a common biosecurity management system containing an animal subpopulation with a distinct health status with respect to a specific disease or specific diseases for which required surveillance, control and biosecurity measures have been applied for the purpose of international trade.

What are **Regionalization / Zones**?

The recognition of geographical zones or regions of a country that can be identified and characterized by its absence of a specific disease or diseases. The zone must be clearly and effectively delineated (separated) by natural, artificial or legal boundaries. The zone must have common control policy for the specific disease.

Aviagen Compartment Status

Zoning and compartments are only officially used for export certification when a country loses its disease free status for notifiable poultry disease.

TWO-STEP PROCESS FOR IMPORTING COUNTRIES

1. Update Export Health Certificate
2. Government-to-government negotiations and country acceptance
